Statement for Supporting a positive impact

Respecting the Communities

At Mamo Building services our vision is: -

To promote strong communication, community support, high health and safety standards, and minimize environmental impact for our communities and those impacted by our operations.

We promote and encourage strong local communities where everyone has the opportunity to thrive and make a difference.

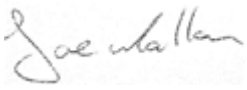

We also encourage people within our organisation:

- **Connecting** with people & organisations across all sections of society and identifying those in need or who would benefit from our help.
- **Influencing** decision-makers and speak out to make a difference: to listen to residents, charities, community groups and social enterprises, who have a voice to shape key decisions about the local community.
- **Targeting** our support to the most vulnerable within society and the more deprived neighbourhoods within our community. We aim to provide help where it is most needed and where our impact can make the most difference.
- **Through volunteering** their services, or resources to make a positive contribution to the life of the community.

We promote:

- Diversity in the workplace
- Anti Bullying
- Health and wellbeing
- Whistleblowing

to ensure we have the trust and support of all stakeholders in protecting their wellbeing and working environment and those impacted from our operations or actions.
